

Ondřej Kukla

Developer Associate

I'm a graduate of Brno University of Technology, faculty of mechanical engineering. I worked as a mechanical designer but this type of work doesn't fulfill me. So I have started my journey in the IT industry. Currently I work as a developer associate at SAP and I really love it here.

- Testing
- Git / GitHub
- Docker
- Visual Studio Code
- Linux basics
- Agile

Language

Czech (native)

English (B2)

Experience

3/2023 - Present

SAP | Brno

Developer Associate

As a SNT I spent my first rotation in the GS in one of Ivan Pudelka's team. There I got an ABAP introduction with some easy tasks to practice it in real life. Except ABAP I got introduced Qmate automatization which felt simpler and fitted me more.

I have been in the FIN department, under Štefan Mišík, for my second rotation. I have spent my time on Qmate test so far. Our agreement is to cover apps of his team with tests and give me insight to FE development.

6/2021 - 12/2022

S.A.B. Aerospace | Brno

Mechanical design engineer

- Design proposals, documentation, communication with customers
- Experiments for the ISS, visualization of proposals
- NX, MS Office
